Archway

Your passage to financial freedom

Motivation:

As our daily expenses add up, money management without any framework gets impractical.

To solve the age-old problem students face, namely “মাস শেষ হওয়ার আগেই টাকা শেষ”, we propose to build a personal finance management software to **keep track of cash-flow** with statistical insights.

Features

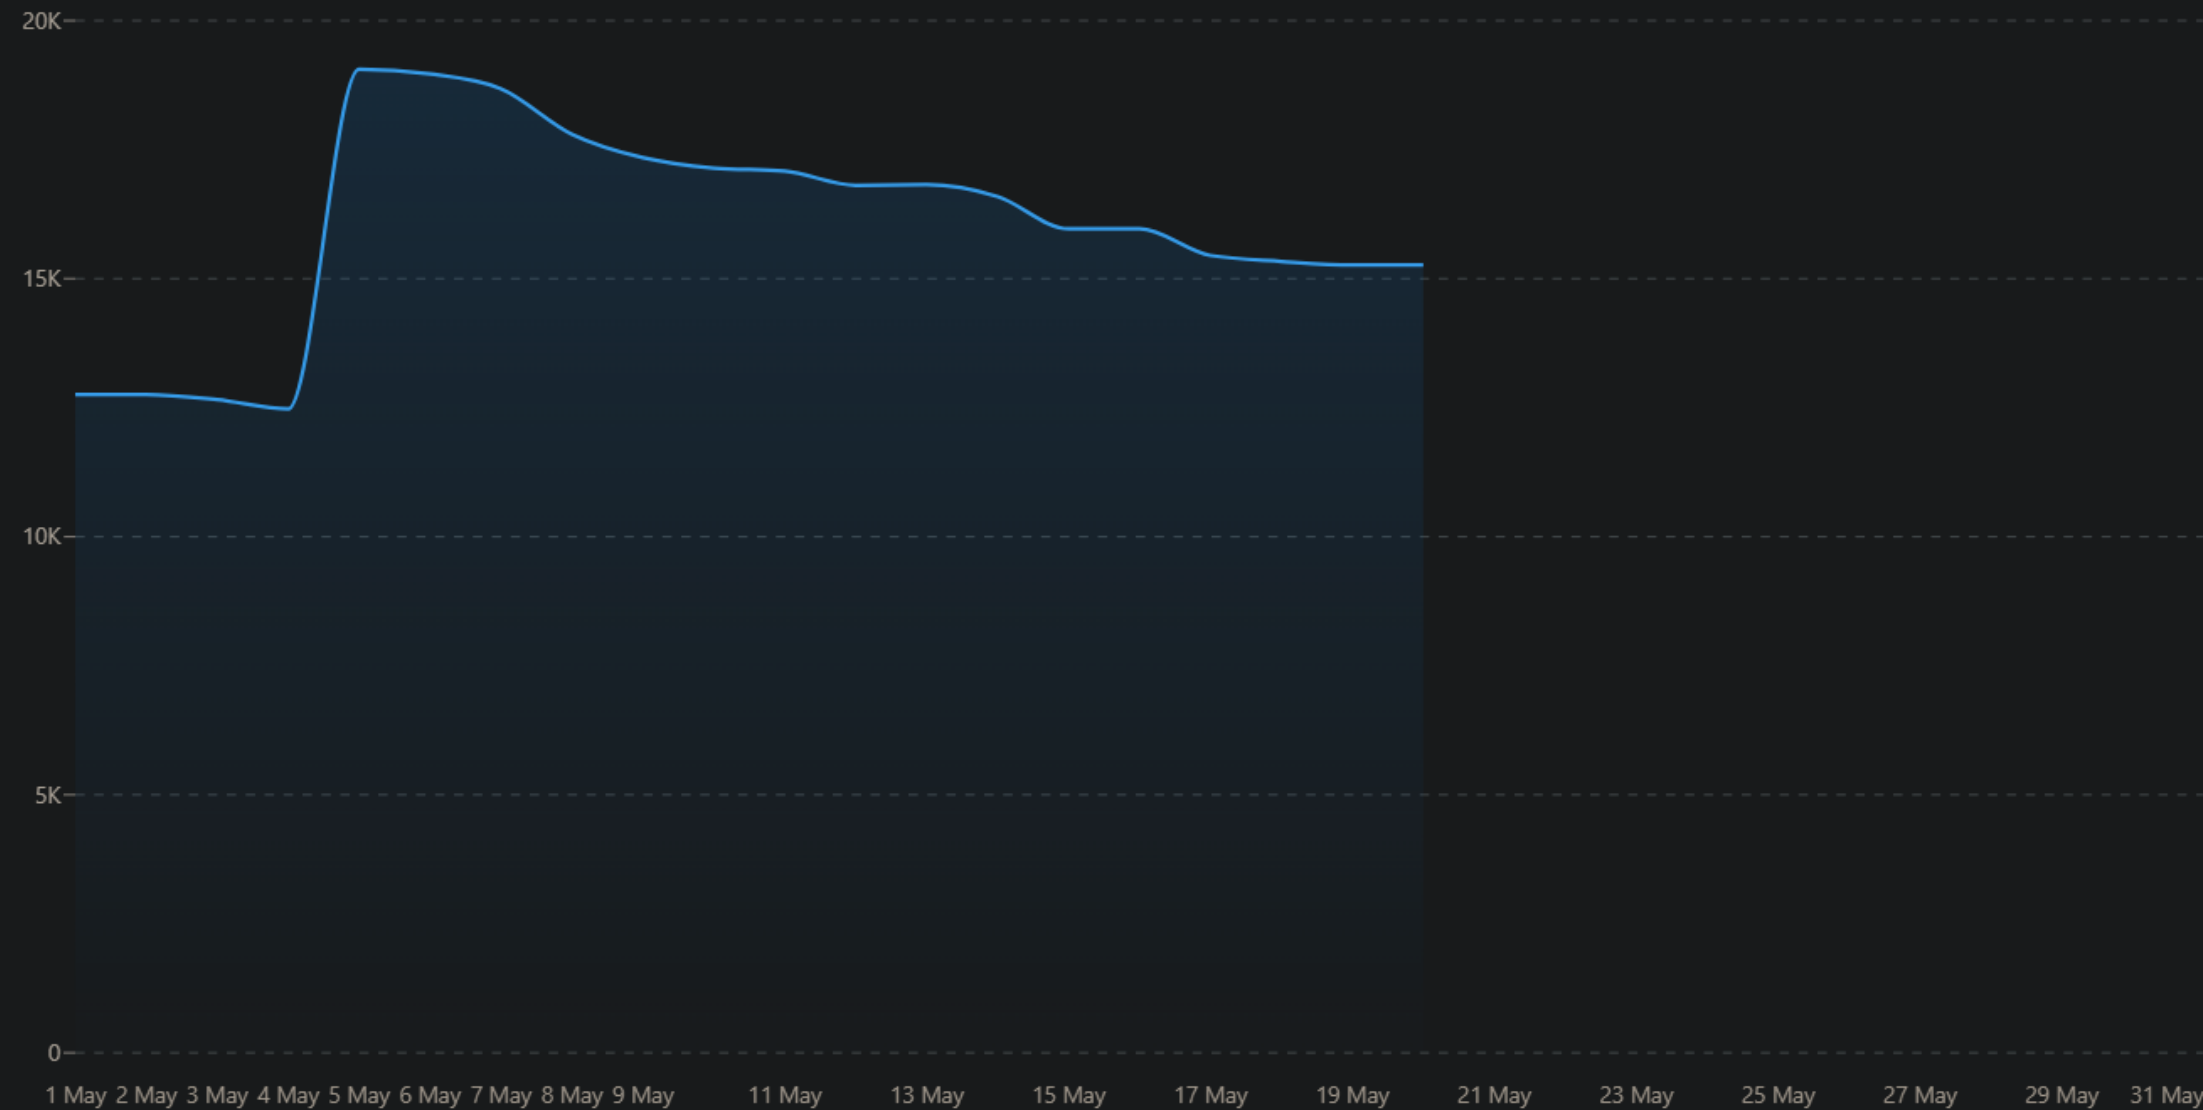

- Monitor cash flow across diverse account types, including cash holdings, mobile financial services (MFS), and bank accounts.
- Get category-wise expenditure analysis, helping you pinpoint where your money goes and why.
- Use interactive comparison charts showing previous month's spending vs this month's.
- See balance trend graphs for all accounts, individual and total.
- Set and track your progress of saving goals.

This month
